HASS 101 | ACADEMIC AND COMMUNICATION SKILLS I | WEEK 2

Plagiarism and Academic Integrity

Citing, referencing, paraphrasing and summarizing

100-minute tutorial

WARM-UP | 5 MINUTES

The 11 p.m. dilemma

Your essay is due at midnight. You find a paragraph online that says exactly what you want to say. What do you do?

A

Copy and paste it into your essay.

B

Copy it, then replace some words with synonyms.

C

Copy it, put it in quotation marks and add the source.

D

Read it, close the tab, write the idea in your own words and cite the source.

In pairs (3 min): rank the options from most to least acceptable. Which are plagiarism? Be ready to explain why.

TODAY

By the end of this class you will be able to

RECOGNIZE

Define plagiarism and recognize its common forms.

EXPLAIN

Explain the consequences of plagiarism and how to prevent it.

CITE

Cite and reference sources using APA 7th edition.

REWRITE

Paraphrase and summarize a source in your own words.

PART 1

Understanding plagiarism

What it is, the forms it takes, why it matters and how to avoid it

What is plagiarism?

Plagiarism is presenting someone else's **words, ideas, data or work** as your own by not giving credit to the source, whether you meant to or not.

Words

Copying sentences or paragraphs without quotation marks and a source.

Ideas

Using someone's argument, theory or findings, even in your own words, without credit.

Work

Images, data, code, translations or another student's essay presented as yours.

Intent changes how a case is judged. It does not change whether a source needs credit.

Do I need to cite it?

CITE IT

- Someone's exact words (in quotation marks)
- Their ideas, arguments and theories
- Statistics, survey results and research findings
- Images, charts, tables, videos and code
- Your own work submitted before

USUALLY NO CITATION

- Your own original ideas and analysis
- Your own data from your own study
- Common knowledge: widely known facts that are easy to check
- When in doubt, cite it or ask your instructor

Pair check (2 min): which of these need a citation?

1. The capital of Uzbekistan is Tashkent.
2. "60% of students prefer online quizzes." (a survey result)
3. In my view, teamwork improves speaking skills.
4. A graph you found on a website.

Six common forms of plagiarism

1 Direct plagiarism

Copying text word for word, on purpose, and submitting it as your own.

2 Mosaic plagiarism

Stitching phrases and sentences from several sources into one text without crediting them.

3 Poor paraphrasing

Swapping a few words for synonyms while keeping the original structure.

4 Source-based plagiarism

Citing misleadingly: a source you never read, a wrong or invented reference.

5 Self-plagiarism

Reusing your own earlier assignment, in whole or in part, without permission or citation.

6 Accidental plagiarism

Forgetting quotation marks, losing track of a source in your notes, citing carelessly.

PART 1 | ACTIVITY

Match the case to the form

In pairs (5 min): decide which of the six forms each case shows. Then discuss: which case would software find hardest to detect?

A Nodira copies two paragraphs from a website into her essay with no quotation marks and no source.

B Jasur joins a sentence from one article, half a sentence from another and a phrase from a third with his own linking words. He cites none of them.

C Aziza changes "important" to "significant" and "students" to "learners" in a sentence from a journal article. Everything else stays the same.

D Bekzod cites a journal article he has never opened. He saw it quoted in a blog post and copied the blog's reference.

E Malika hands in, unchanged, an essay she wrote for another course last semester.

F Timur copied a sentence into his notes without quotation marks, forgot it was not his own wording and later used it in his essay.

Answer key: matching the cases

Case	Form	Why	How to fix it
A	**Direct plagiarism**	Word-for-word copying with no quotation marks or source	Quote briefly with quotation marks and cite, or paraphrase and cite
B	**Mosaic plagiarism**	Fragments of three sources joined together and uncredited	Cite every source; build the paragraph around your own argument
C	**Poor paraphrasing**	Only synonyms changed; the sentence structure is the original's	Rewrite from notes with new structure and vocabulary, then cite
D	**Source-based plagiarism**	Cites a source he never read	Read the original, or cite the source you actually read ("as cited in")
E	**Self-plagiarism**	Earlier work resubmitted without permission	Ask your instructor; cite your earlier work if reuse is allowed
F	**Accidental plagiarism**	Notes did not separate quotations from own words	Mark quotations and record sources while taking notes

Other integrity breaches: AI and translation

Unacknowledged AI use

Submitting AI-generated text as your own, or using AI on a task where it is not allowed, is a form of plagiarism. AI tools can also invent sources and citations that do not exist, so verify every reference they give you before you use it.

Uncredited translation

Translating a passage from Uzbek, Russian or English and presenting the translation as your own original writing is still plagiarism. Cite the original text and, where relevant, note that the passage is your translation.

Not sure whether AI is allowed for a task? Ask before you use it. When it is allowed, check every claim and every source it gives you.

Collusion

Definition: working with other people inappropriately on a task that is meant to be done individually, such as submitting identical or near-identical work.

GOOD

- Discussing ideas, themes or structure with classmates
- Explaining a concept to a friend in your own words
- Studying together and testing each other
- Comparing understanding of the task requirements

NOT FINE

- Submitting the same or a near-identical essay as a classmate
- Writing or rewriting a friend's sentences for them
- Dividing an individual assignment and stitching the parts together
- Sharing a full draft for someone else to submit as theirs

Personation

Definition: pretending to be someone else, or letting another person do your academic work for you.

EXAMPLES

- Paying or asking someone else to take your test or exam
- Submitting an assignment written by another person, including contract-cheating services
- Using another student's ID, login or account to complete work
- Having someone else attend class or a viva in your place

AVOID IT

Always complete and submit your own work, honestly and under your own name. If you are struggling, ask your instructor for an extension or support rather than asking someone else to stand in for you.

Why does it matter?

Academic

You may get a zero for the work, fail the course or face formal disciplinary action.

Professional

Lost trust and credibility. Published articles can be retracted; employees can be dismissed.

Legal and financial

Copying protected material can lead to copyright claims and financial penalties.

Personal

You skip the practice that builds your thinking and writing, the skills a degree certifies.

Plagiarism is first an ethical and academic offense. It can also become a legal one when copyright is involved. Sanctions depend on the institution and the case.

How to avoid plagiarism: five habits

Start early

Most plagiarism happens when time runs out.

Take careful notes

Mark quotations and write down source details as you read.

Use your own words, then cite

A paraphrased idea still needs a citation.

Build your reference list as you go

Add every source when you first use it.

Check before you submit

Compare with the source. Use a similarity report if one is available.

Similarity checkers are a safety net, not a verdict

- Tools such as Turnitin and iThenticate highlight text that matches other sources.
- A high score is not proof of plagiarism, and a low score is not proof of originality.
- You still have to read the report and judge it.

PART 1 | QUIZ GAME

Plagiarism or fine?

Vote on each statement. About 30 seconds each, then check the key.

1. Copying a paragraph from Wikipedia word for word, with no citation.
2. Quoting one short sentence in quotation marks, with author, year and page.
3. Changing a few words in a sentence but keeping its structure. No citation.
4. Paraphrasing a paragraph fully in your own words and citing the author.
5. Pasting a paragraph from a friend's essay because she said you could.
6. Using your own idea, in your own words.
7. Asking an AI tool to write your paragraph and submitting it as your own.
8. Writing "Tashkent is the capital of Uzbekistan" without a citation.

Answer key

#	Verdict	Why
1	Plagiarism	Copied text with no credit.
2	Fine	Short, cited quotation with quotation marks and page number.
3	Plagiarism	Poor paraphrasing: synonyms and no citation.
4	Fine	A true paraphrase with credit to the source.
5	Plagiarism	Submitting someone else's work (collusion), even with permission.
6	Fine	Your own thinking needs no citation.
7	Plagiarism	Unacknowledged AI text is not your own work.
8	Fine	Common knowledge needs no citation.

PART 2

Citing and referencing

APA 7th edition: how readers find your sources

Citation, reference list, bibliography

In-text citation

A short pointer in your sentence: author, year and, for quotations, page.

(SMITH, 2020)

Reference list

Full details of every source you cited, alphabetical, at the end of the paper.

ONLY SOURCES YOU CITED

Bibliography

Everything you consulted, cited or not. APA uses a reference list instead.

NOT USED IN APA

THE TWO-WAY RULE

Every in-text citation must appear in the reference list, and every entry in the reference list must be cited in the text.

In-text citations: two ways

NARRATIVE: author in the sentence

Smith (2020) found that students perform better when their surroundings support focus.

PARENTHETICAL: author in brackets

Students perform better when their surroundings support focus **(Smith, 2020)**.

Number of authors	Narrative	Parenthetical
One author	Smith (2020)	(Smith, 2020)
Two authors	Smith and Lee (2020)	(Smith & Lee, 2020)
Three or more	Smith et al. (2020)	(Smith et al., 2020)

APA 7th: use "et al." from the first citation when a source has three or more authors. Older handouts (APA 6th) list all authors first.

Quoting: short, long and no page numbers

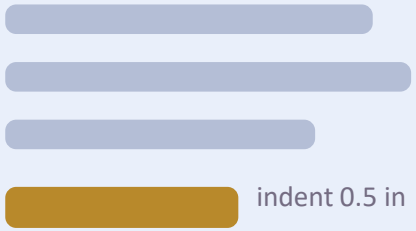

Short quotation

Under 40 words. Keep it in your sentence, use quotation marks and add the page.

Smith (2020) argues that **"context plays a vital role in shaping behavior"** (p. 45).

Long quotation

40 words or more. Start a new line, indent the block, drop the quotation marks.

No page numbers?

For web pages, give a paragraph number or a section heading instead of a page.

(Smith, 2020, para. 4)
or
(Smith, 2020, Discussion section)

Quote sparingly. Use exact words only when the wording itself matters, such as a definition or a striking phrase. Otherwise, paraphrase.

Special cases at a glance

Situation	In-text example	In the reference list?
No author	("Study tips for exams," 2021) use the first words of the title	Yes. The title moves to the author position.
No date	(Smith, n.d.)	Yes. Write (n.d.) in the date position.
Secondary source	(Karimov, 2010, as cited in Smith, 2020)	Only Smith (2020), the source you read.
Group author	(World Health Organization, 2020)	Yes. The group name is the author.
Personal communication	(A. Karimov, personal communication, May 3, 2026)	No. Readers cannot retrieve it.
Several sources	(Lee, 2019; Smith, 2020) alphabetical order, semicolons	Yes. List every source.

The reference list

References

Cottrell, S. (2019). *The study skills handbook* (5th ed.). Bloomsbury Academic.

Karimov, A. (2021). *Managing your time at university*. Northgate Press.

Smith, J., & Lee, R. (2020). Motivation in classroom learning. *Journal of Classroom Studies, 34*(2), 123–135. https://doi.org/10.1234/example

Fictional entries, except Cottrell (2019)

1 **Heading**

Start on a new page. "References" in bold, centered.

2 **Order**

Alphabetical by the first author's surname. No author? Start with the title.

3 **Same author**

Earliest year first.

4 **Layout**

Hanging indent of 0.5 inch (first line flush left) and double spacing.

5 **Content**

Only sources you cited in the text.

Anatomy of a journal article reference

Smith, J., & Lee, R. (2020). Motivation in classroom learning. *Journal of Classroom Studies, 34*(2), 123–135. https://doi.org/10.1234/example

Authors

Surname, initials. Use "&" before the last author.

Year

In parentheses, followed by a full stop.

Article title

Sentence case (first word and proper nouns only). Not italic.

Journal and volume

Journal title in Title Case, in italics. The volume number is italic too.

Issue and pages

Issue in parentheses, not italic. Page range with an en dash.

DOI

A full link starting https://doi.org/ with no full stop after it.

Other common sources (APA 7th)

Source	APA 7th template	Note
Book	Author, A. A. (Year). *Title of book* (ed.). Publisher.	No city. Add the edition only if it is not the first.
Chapter in an edited book	Author, A. A. (Year). Title of chapter. In E. E. Editor (Ed.), *Title of book* (pp. xx–xx). Publisher.	Editor's initials come before the surname.
Web page	Author, A. A. (Year, Month Day). *Title of page*. Site Name. URL	No date? Use (n.d.). Omit the site name if it is the author.
Video (TED, YouTube)	Speaker, A. A. (Year, Month Day). *Title of video* [Video]. Platform. URL	Video title in italics. Add [Video] after it.

Changes from APA 6th: no publisher city; no "Retrieved from" before a URL (use it only for pages designed to change); DOIs written as https://doi.org/ links.

DOI: a permanent link for an article

- A DOI (digital object identifier) is a unique code given to a published work, with a permanent link.
- Find it on the first page of the article or on the database record.
- Write it as a full link: https://doi.org/...
- No DOI? Use the article's URL. A retrieval date is not needed.

HOW A DOI LOOKS

`https://doi.org/10.1234/example`

Prefix (10.1234) identifies the publisher or organization that registered the DOI.

Suffix (example) identifies the specific article. The publisher chooses it.

Fictional DOI, for illustration only

Find and fix the errors

In pairs (6 min): find every APA 7th error and rewrite each item correctly.

1

IN-TEXT CITATION

According to Smith & Lee 2020 "students study better in quiet places" page 45.

2

JOURNAL ARTICLE (DOI: 10.1234/EXAMPLE)

Smith J., Lee R. "Motivation in Classroom Learning." Journal of Classroom Studies. Vol. 34, Issue 2, 2020, pp. 123-135.

3

BOOK

Cottrell, Stella. The Study Skills Handbook. London: Bloomsbury Academic, 2019. 5th edition.

Corrected versions

1

According to Smith and Lee (2020), "students study better in quiet places" (p. 45).

What changed: "and" in narrative citations; year in parentheses; comma; "p." for page.

2

Smith, J., & Lee, R. (2020). Motivation in classroom learning. *Journal of Classroom Studies, 34*(2), 123–135. https://doi.org/10.1234/example

What changed: Initials and "&"; year after authors; sentence case, no quotation marks; italic journal and volume; no "Vol.", "Issue", "pp."; en dash; DOI link.

3

Cottrell, S. (2019). *The study skills handbook* (5th ed.). Bloomsbury Academic.

What changed: First initial only; year after author; italic sentence-case title; edition in parentheses; no city.

PART 3

Paraphrasing and summarizing

Using sources in your own words, without losing the credit

Three ways to use a source

	Quotation	Paraphrase	Summary
What it is	The exact words, in quotation marks	One idea restated in your own words and structure	Only the main ideas, in your own words
Length	Same as the original	About the same length	Much shorter
Use it when	The wording itself matters	You need the detail of a specific point	You need the big picture of a whole text
Citation	Author, year, page	Author, year	Author, year

All three need a citation. Changing the words does not remove the need to credit the source.

How to paraphrase: six steps

1 Read

Read the passage until you fully understand it.

2 Note

Jot down the key ideas as words or short phrases, not full sentences.

3 Close

Close the source or turn it over.

4 Write

Write from your notes, with new words and a new sentence structure.

5 Compare

Check the meaning against the original. Too close? Rewrite it or put exact phrases in quotation marks.

6 Cite

Add the author and year. A paraphrase still needs a citation.

Test yourself: if you cannot explain the idea without looking at the source, you have not understood it yet.

Paraphrasing: weak vs. improved

ORIGINAL (practice text: Karimov, 2021, p. 34)

Time management is not about doing more in less time. It is about deciding which tasks deserve attention first, so that limited hours are spent on the work that matters most.

WEAK

"Time management is not about performing more in less time. It is about selecting which tasks merit attention first, so restricted hours are used on the work that counts most."

Why it fails: same structure, only synonyms swapped, no citation.

IMPROVED

Karimov (2021) argues that good time management means prioritizing: students should decide which tasks are most important before they begin, rather than trying to fit more into each hour.

Why it works: new structure and vocabulary, same meaning, source credited.

How to summarize: five steps

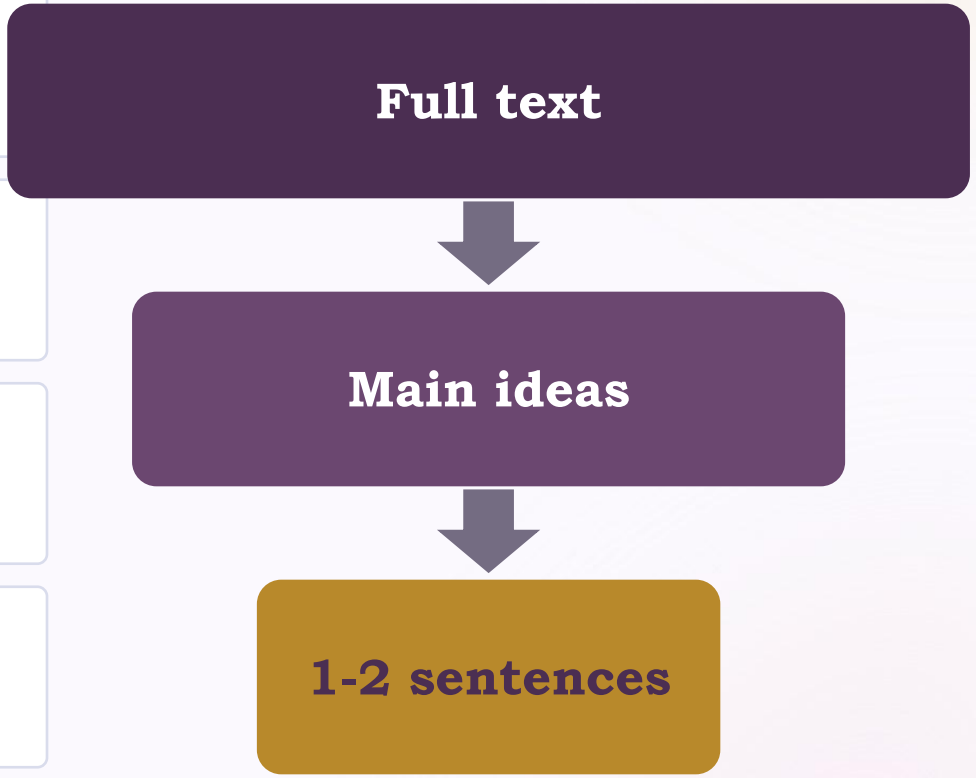

1. **Read the whole text**
   Get the overall picture before you write anything.

2. **Find the main idea of each part**
   Use headings and topic sentences.

3. **Cut the detail**
   Leave out examples, repetition and minor points.

4. **Write in your own words**
   Use your own structure. Work from notes, not from the source.

5. **Cut the source**
   Author and year, every time.

Example of a Summary

Original Text	Summary
Organisational Development (OD) practioners assume that it is important for people to be accepted by their work group and that the climate in most groups and organisations does not encourage open expression of feelings. The necessity of hiding feelings, OS practitioners believe, has a negative effect not only on group member's willingness and ability to solve problems constructively, but also on job satisfaction and performance. Encouraging openess can be difficult and risky, but it can also lead to **greater job satisfaction and more effective group performance.**	**Stoner and Wankel (1986) conclude that** it is the view of Organisational Development (OD) practitioners that **a better and more enjoyable team effort** can result if the workplace environment encourages emotional openess.

Notice how the summary begins by introducing the authors. This type of referencing is called 'strong author orientation', and is appropriate where you wish to emphasise 'who' said what...

Helpful HINT ~

Notice the summary draws mainly from the concluding sentence in the original paragraph. This is because the concluding sentence often contains the author's evaluation of the paragraph's content.

Source: unilearning

PART 3 | ACTIVITY

Plagiarism detective

In pairs (6 min): is each student version acceptable? If not, say why and fix it.

ORIGINAL (practice text: Nazarov, 2022, p. 12)

Reading a text critically means asking who wrote it, why they wrote it and what evidence they use to support their claims. Readers who accept every claim without question are more likely to repeat errors in their own writing.

A Reading a text critically means asking who wrote it, why they wrote it and what evidence they use to support their claims (Nazarov, 2022).

B Reading a text critically involves questioning who authored it, why they authored it and what evidence they utilize to back their assertions (Nazarov, 2022).

C Nazarov (2022) suggests that critical readers question an author's purpose and evidence; those who simply believe everything they read may repeat mistakes in their own work.

D Critical readers ask who wrote a text, why it was written and what evidence supports it. Accepting claims without questions makes readers more likely to copy errors into their writing.

Detective key

Version	Verdict	Why	Fix
A	Not acceptable	Word-for-word copy. The citation does not fix missing quotation marks.	Use quotation marks and a page number, or paraphrase properly.
B	Not acceptable	Poor paraphrasing: same structure, only synonyms swapped.	Rewrite from notes with a new structure, then cite.
C	Acceptable	New structure and vocabulary, same meaning, source credited.	None needed.
D	Not acceptable	Good rewording, but the idea is not credited.	Add the citation: (Nazarov, 2022).

A and B both carry a citation and are still problematic: a citation does not make copying acceptable.

Now you: paraphrase, summarize, cite

SOURCE (practice text: Rahimova, 2024, p. 8)

Generative AI tools can produce fluent text in seconds, but they do not check whether their claims are accurate or where the ideas came from. Students who copy this output without checking risk including false statements and invented references in their work.

Book details: Rahimova, N. (2024). Writing with AI: A student guide. Northgate Press. (Fictional source.)

1

Paraphrase

Write one paraphrase with an in-text citation.

2

Summarize

Write a one-sentence summary with a citation.

3

Cite

Write both citation forms: narrative and parenthetical.

4

Reference

Write the reference-list entry in APA 7th.

WRAP-UP | 4 MINUTES

Key takeaways

Plagiarism is using words, ideas or work without credit. Copying, poor paraphrasing and unchecked AI text all count.

Cite in the text and list in the references: every source, in both places.

A good paraphrase has new words, a new structure and a citation.

When in doubt, cite it or ask.

EXIT TICKET

On a piece of paper, write:

1. One habit you will change.

2. One question you still have.

WRAP-UP

Independent study and next week

1

Paraphrase and cite

Paraphrase one paragraph from the course textbook (Cottrell, 2019). Write the in-text citation and the reference entry in APA 7th.

2

Reference a video

Write an APA 7th reference for the Week 2 TED Talk by Carol Dweck. Find the speaker, date and title on the TED page.

3

Use the checklist

Check one paragraph from your own writing against the six paraphrasing steps.

COMING UP

Week 3

Listening and note-taking: Cornell notes, active listening, mind-maps.

Week 4: Assignment 1, the Annotated Bibliography, uses everything from today.

Sources and further reading

American Psychological Association. (n.d.). *APA Style*. https://apastyle.apa.org

American Psychological Association. (2020). *Publication manual of the American Psychological Association* (7th ed.). https://doi.org/10.1037/0000165-000

HASS 101 | ACADEMIC AND COMMUNICATION SKILLS I | WEEK 2 · TUTORIAL 2

Research Methods and Academic Search Databases

How to choose a research method, and how to find credible academic sources

Leads into Task 1

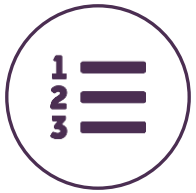

TODAY

By the end of this class you will be able to

DISTINGUISH

Distinguish between the main types of research methods.

CHOOSE

Choose a research method that fits a given research question.

SEARCH

Use an academic database to find credible, citable sources.

EVALUATE

Judge whether a source is credible enough to use in academic work.

PART 1

Research methods

What a research method is, and the main types you can choose from

What is a research method?

A research method is the **systematic approach** a researcher uses to collect, analyze and interpret information in order to answer a research question.

The topic

What you are studying: for example, student time management, or motivation in the classroom.

The method

How you study it: for example, a survey, a set of interviews, or an analysis of existing records.

The same topic can be studied with different methods. The method you choose shapes what kind of answer you get.

Eight common research methods, grouped by purpose

BY PURPOSE: why are you researching?

1 Descriptive

Describes characteristics of a group or situation as it is, without explaining why.

2 Analytical

Uses existing information to explain relationships and causes, going beyond description.

3 Applied

Aims to solve a specific, practical problem in a real setting.

4 Fundamental

Builds general knowledge or theory, without an immediate practical use in mind.

BY DATA: what kind of evidence will you use?

5 Quantitative

Works with numbers and measurable variables, analyzed statistically.

6 Qualitative

Works with words, images or experiences, to understand meaning in depth.

7 Conceptual

Works with ideas and existing theory, without new data collection.

8 Empirical

Works with data from direct observation or experiment.

One project can combine a purpose (why) with a data type (how): for example, applied and qualitative research into how students manage exam stress.

PART 1 | ACTIVITY

Which method fits the question?

In pairs (6 min): which method, or combination, fits each question best? Be ready to explain why.

1. How many hours per week do first-year students spend on independent study?

2. Why do some students disengage during long lectures?

3. Does a new note-taking method improve exam scores in this class?

4. What does existing research say about motivation and academic performance?

PART 2

Academic search engines and databases

Finding sources you can actually trust and cite

Why not just search the open web?

Open web search

Anyone can publish. No review process. Mixed quality: alongside solid material, you will find opinion, marketing and misinformation.

Academic databases

Mostly peer-reviewed or editorially checked. Indexed by subject and source type, so you can filter and cite with confidence.

Google Scholar sits in between: free and easy to search like the open web, but it mostly indexes academic sources, which makes it a good starting point.

Databases worth knowing

Database	Best for	Note
Google Scholar	General, all subjects	Free, broad coverage; a good first search, though it mixes source quality.
JSTOR	Humanities and social sciences	Strong for older, foundational journal articles and books.
ERIC	Education and language learning	A good fit for topics in academic writing, learning and teaching.
Scopus / Web of Science	Sciences and social sciences	Citation databases: useful for seeing how often a work has been cited.
Your library portal	Whatever your library subscribes to	Often the only way to reach full-text articles that sit behind a paywall.

Check with the library which of these your university actually subscribes to, and how to log in with your student account.

Building a better search

Pull out keywords

Turn your question into 2-4 key terms, not a full sentence.

```
"How does sleep affect memory in students?" -> sleep, memory, students
```

Combine and filter

Use AND to narrow, OR to broaden, quotation marks for an exact phrase, and filters for date and peer review.

```
sleep AND memory AND "college students"
```

Is this source good enough to cite?

C	**Currency**	How recent is it? Does this topic need up-to-date information?
R	**Relevance**	Does it actually address your research question?
A	**Authority**	Who wrote it? What are their credentials or affiliation?
A	**Accuracy**	Is it supported by evidence? Can you verify its claims elsewhere?
P	**Purpose**	Why was it written: to inform, persuade, sell or entertain?

PART 2 | ACTIVITY

Find a source

In pairs (8 min): search for one source and evaluate it.

1

Pick a topic

Choose a topic you find interesting, ideally one you might use for Task 1.

2

Search a database

Open Google Scholar or another database and build a search with 2-4 keywords.

3

Apply the CRAAP test

Pick one result and check it against currency, relevance, authority, accuracy and purpose.

4

Be ready to share

One sentence on the source, and whether you would use it.

PART 3

Task 1

Putting research, citation and academic writing together

Task 1: research, write and cite

We have now covered research methods, academic databases, citation and paraphrasing. Task 1 asks you to bring all of it together.

1	**Choose a topic**	Choose one topic from the top 7 units of the Study Skills Handbook.
2	**Research it**	Research and study the topic using an academic database from this class.
3	**Write**	Write at least 200 words about the topic, using APA format throughout.
4	**Cite**	Include at least 3 in-text citations, and present a reference list at the end.
5	**Submit**	Send your work to the professor's email address by Sunday at 10 pm.

Before you go

DEADLINE

Sunday, 10:00 pm

Send to: your professor's email address

- At least 200 words, in APA format
- At least 3 in-text citations
- A reference list entry for every source cited
- Topic from the top 7 units of the Study Skills Handbook

REMEMBER

- Use a database from today, not just an open web search.
- Run your citations through the two-way rule: every citation in the reference list, every reference cited in the text.
- Questions before Sunday? Ask early, not at 9:45 pm.
